

Money Machines International's CMX01 Coin Counter/Packager

Small and light – or big for more volume?

CMX01 is the lightest coin counter in its class, and its integrated handle allows easy carrying. The small footprint leaves more space on your desk when used stationary.

Fast and efficient

CMX01 count up to 3,400 coins per minute. RapidSwitch™ allows up to 30% faster bag change and up to 40% time saving in tubing. The optional foot pedal makes tubing even faster.

Making the job easier

The color LCD display makes more information visible than any other machine in this category. The assistance program helps managing the counting results and helps printing the total sums via an external printer. Function keys allow direct access to all routine settings.

PRODUCT SPECIFICATIONS
