

## **Money Machines International's CMX01 Coin Counter/Packager**

### **Small and light – or big for more volume?**

CMX02 is the stationary version of CMX01 with a bigger hopper for applications where big volumes need to be counted fast and reliably. CMX02 offers more comfort than any other unit in its category.

### **Fast and efficient**

CMX02 count up to 3,400 coins per minute. RapidSwitch™ allows up to 30% faster bag change and up to 40% time saving in tubing. The optional foot pedal makes tubing even faster.

### **Making the job easier**

The color LCD display makes more information visible than any other machine in this category. The assistance program helps managing the counting results and helps printing the total sums via an external printer. Function keys allow direct access to all routine settings.
